### **DETAILED ACTION**

Claims 30-55 are pending. Claims 30-55 are under consideration.

#### ***Response to Arguments***

Applicant's amendment and arguments filed on September 7, 2004, have been fully considered and are deemed to be persuasive to overcome the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

The indicated allowability of claims 31-32, 41 and 49-50 are withdrawn in view of the newly cited rejection under 35 USC 112, 2nd rejection.

#### ***Terminal Disclaimer***

The terminal disclaimer filed on September 7, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,743,607 has been reviewed and is accepted. The terminal disclaimer has been recorded.

#### ***Claim Objections***

Claims 30, 35, 36, 39, 44, 45, 46, 48, 52 and 53 are objected to because of the following informalities: The claims recite an abbreviated "rfe" without providing its

Art Unit: 1652

expansion. The Examiner requests the applicants to expand the abbreviation at least in the first recitation. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 30-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite the term "gene". The metes and bounds of the phrase in the context of the above claim is not clear to the Examiner. A gene comprises of a coding sequence and introns, exons and regulatory sequences. A perusal of the specification did not provide the Examiner with a specific definition for the above phrase. Therefore, it is not clear whether the above term in said claims encompass the intronic and regulatory sequences or is limited to a cDNA.

None of the claims are allowable.
